TO: Parents, Guardians

FROM: Health Services Department
Richard P. Kulak, D.O., FAAFP, Director
M.Cheryl Vitaletti, Supervisor

SUBJECT: CHILDREN AT RISK FROM COMMUNICABLE DISEASE

Please be aware that in our school district the health of some children could be seriously at risk if they are exposed to typical communicable diseases (ex. chicken pox, measles, rubella).

If you suspect your child is ill, please do not send him/her to school until a diagnosis has been made and instructions from your doctor have been received. In addition, if your child is diagnosed with one of these normal childhood diseases, please notify your school nurse as soon as possible so she can limit or prevent exposure of other children she knows who may be at risk for serious illness.

The health of all our children is of utmost importance. We appreciate your concern and cooperation.
