

Online Database Links

Thanks to the SCSD School Library System, staff and students in our district have access to many useful databases. Some are provided by the state, while others are subscriptions purchased by the district.

These databases are available through the Library Links @ <http://youseemore.com/scsd> and click on database links or go directly to <http://weblink.scsd.us/~liblinks/home.html> and may be used at school or from home with the appropriate passwords.

Passwords are updated periodically, so it is important to obtain the latest information from the school library system office.

Syracuse City School Library Links

Special Feature: NOVEL Lesson Plan Examples

Homework Links

Links Just for Young Researchers

(Click on the ? to get information or use a tutorial for each database)
